GCC Campus WiFi System

In order to provide seamless wireless network throughout the campus of 5 Wai Chi Street, a total of 19 Access Points (AP) have been deployed in selected locations. These AP were managed by an Intelligent AP Controller that provides easy but secured authentication and seamless roaming in the campus.

Two-steps authentication

To configure a new device, you need to authenticate yourself with your EID and Password. A Dynamic Password (D-PSK) will be generated for the device. You will be able to connect to the Campus WiFi with the D-PSK.

For Generic Operating System

This should apply to any devices that support WiFi connection.

Step One

- When you are in range of the GCC Campus WiFi, search for available WiFi networks
- Connect to "GCC-Provision" network. It is an open network that does not require password
- You will be redirected to a login page. Key in your EID and Password. In some devices, you may need to open a browser and browse to any web site.
- On successful authentication, you should see a dialog box similar to the one below:

Click on the "click here" link. You will be showed a password. Select and copy it.

Step Two

Now, it is time to connect to the secured campus WiFi network.

- Search the a WiFi Network and connect to "GCCWIFI"
- Paste the password obtained in the previous step into the password or passphase box then click connect.
- You are now connected to the GCC Campus WiFi

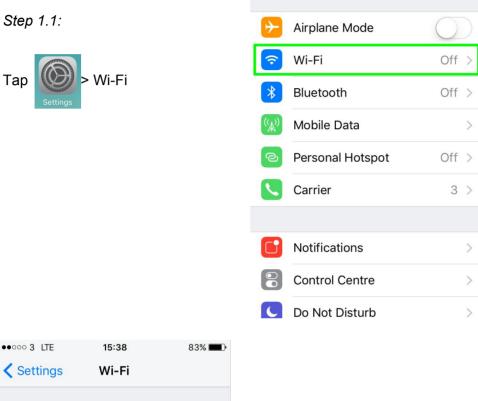

Note: You will be connected to the GCC Campus WiFi when your device is in range
